

WATER PROOFING SOLUTIONS

Silicon Seal

Builders

aqWA will silicon seal wet areas including bathrooms, kitchens laundries. We can do this in addition to the Waterproofing (Tanking) in wet areas. Our processes supersede Australian standards, which offers you a process second to none. We go above and beyond requirements.

Home owners / renovators / Owner builders

Does the silicon in your kitchen or bathroom look tired and grotty?? Is it full of mould?? Has your grout near your sliding door cracked??

aqWA can rejuvenate and repair all those tiled areas in your house that need re-doing.

Why? Apart from giving your home a real lift and a relatively cheap makeover, silicon provides a barrier to moisture, which can cause damage in those wet areas. Overtime silicon can become damaged and lose its effectiveness as a waterproofing barrier. If this happens, moisture can penetrate and cause water related problems, which can become expensive to repair.

aqWA have trained staff that can come in and remove all the old silicon and replace it with a quality product. It will give those areas a real lift and makeover making your home look new and fresh.
